Abstract (en)
[origin: CA2907954A1] The invention relates to a twin roller crusher (1) with rollers (2, 3) that are rotatably mounted in a crusher housing and are motor-driven so as to turn synchronously in opposite directions, the center axes thereof being aligned in parallel to each other. Crusher teeth (6, 7) are arranged on the outer face of the crushers (2, 3), said teeth projecting beyond the lateral surfaces, every crusher tooth (6, 7) of a roller (2, 3) of the pair of rollers being associated with a pocket (8, 9) in the lateral surface of the other roller (2, 3) of the pair of rollers such that when the rollers (2, 3) rotate the crusher tooth (6, 7) is inserted into the pocket (8, 9).
