Abstract (en)
[origin: WO2014161969A1] The invention relates to a heating apparatus (100) comprising: - a frame (101), a rear face (102) of the frame being suitable for being secured to a vertical wall; - a radiating element (105) consisting of a fragile material forming a façade (106) of the apparatus, the frame comprising at least one securing means (107, 108) by means of which a rear face (109) of the radiating element is linked to said frame; - a support (118) rigidly connected to the frame, provided on a first face (119) with a means (120) for heating the radiating element, and of which a second face (121) is adhered to the rear face of the radiating element.
