Abstract (en)

[origin: WO2014162000A1] The invention relates to the field of medical equipment. The invention addresses the problem of how to make the operation of medical equipment easier and more certain. The invention proposes methods and devices in which a transparent display is placed in front of at least parts of medical equipment so that these parts of the medical equipment are visible through the transparent display, and so that information such as operating instructions or messages are shown on the transparent display.
