Abstract (en)
[origin: WO2014161670A1] The invention relates to a lamp (1) comprising a light source (2) that can be excited by microwaves to provide illumination and a housing (4) surrounding the light source, said housing having at least one light exit opening (5). A grille structure (6) or labyrinth structure (7) acting as a microwave shield is associated with the light exit opening (5).
