Abstract (en)

[origin: EP2982254A1] In a capsule for a smoking article in a substantially tubular shape that is installed in a filter for the smoking article, a tubular circumferential wall, and a pair of end walls that respectively close both ends of the circumferential wall are included, a liquid is encapsulated in an interior, at least one of the end walls is elastically deformable, and groove-shaped thin-walled regions formed of straight lines or curved lines are provided in the one end wall to meet at two or more meeting points.
