Abstract (en)
[origin: CA2899531A1] A telescopic handling device comprises at least two elements (1, 2) mounted so as to slide relative to one another with interposition of sliding shoes (3, 4). The device comprises thinner holding means (5, 6) for the sliding shoes so as to limit the separation between two sliding elements to the thickness of the interposed sliding shoes (3, 4).

Abstract (fr)
Un dispositif télescopique de manutention comporte au moins deux éléments (1, 2) montés à coulissement relatif avec interposition de patins de glissement (3, 4). Le dispositif comporte des moyens de maintien (5, 6) des patins de glissement, d'épaisseur réduite, de manière à limiter l'écartement entre deux éléments à l'épaisseur des patins de glissement (3, 4).
