Abstract (en)

[origin: WO2014167515A1] The electronic smoking substitutive device comprises a tubular body (2) of rigid material, inside which a rechargeable electric battery and an atomizer suitable to be powered by said electric battery are arranged. Activation means (5) allow to operate the heating of said atomizer by the electric battery. A tank (10) containing an inhalable substance in aqueous solution is suitable to be placed in disposable manner in contact with said atomizer.
