Abstract (en)

[origin: WO2014165882A1] The invention relates to a spring/damping element (1) that can be arranged in or adjacent to a shoe (2), comprising first magnets (3) together with a first fastening element (4) for attaching the first magnets (3) to a first portion (5) of the shoe (2), second magnets (6) together with a second fastening element (8) for attaching the second magnets (6) to a second portion (7) of the shoe (2) or in a region adjacent to the shoe (2), wherein at least one first magnet (3) is supported movably in relation to at least one second magnet (6), wherein the first magnets (3) and the second magnets (6) are arranged in accordance with the Halbach array principle.
