Abstract (en)
[origin: WO2014168485A1] The present invention regards an arrangement and a method for removing a portion of debris (300) settled on an upper side of a barrier (114), the arrangement and the barrier being integrated in a portion of a tubing (201), the barrier (114) isolating a first tubing section (2002, 2003) from a second tubing section (2001) containing the debris (300), the arrangement comprising: - an inlet (405) communicating with the first tubing section (2002, 2003); - at least one outlet (401, 402, 403) communicating with the second tubing section (2001); - a fluid conduit (400) connecting the inlet (405) with the at least one outlet (401, 402, 403); and - means (112, 113) for controlling fluid flow from the first tubing section (2002, 2003) to the second tubing (2001) via the flow conduit (400).
