Abstract (en)
[origin: WO2014166565A1] Disclosed is a composite brake disk (1), in particular for a motor vehicle, comprising a frictional ring (2) and an annular coupling body (3), which comprises a double-walled casing (4) that has a radially external outer wall (5) and a radially internal inner wall (6). The two walls (5, 6) are arranged coaxially towards each other and each have a coupling profile (22) that engages into a complementary frictional ring profile (23), which is provided on the frictional ring (2), in order to transmit torque.
