Abstract (en)

[origin: WO2014168553A1] A navigation unit (120), an analysis unit (150) and methods (400, 600) in a vehicle (100) for the planning of a route (220) for the vehicle (100) when the vehicle (100) has been affected by a limitation in its ability to progress. The method (400) comprises the reception (401) of a request for a route (220) with a route property (210), from an analysis unit (150) in the vehicle (100), selection (402) of a route (220) for the vehicle (100) that possesses the route property (210) that has been received, and presentation (403) of the selected (402) route (220) on a display (130), such that the driver is given the possibility to choose this route (220), or to reject it and instead continue along the original route.
