Abstract (en)  
[origin: WO2014166756A1] The present invention relates to a heat exchanger component (1) of a temperature control system of an electric energy accumulator (18). According to the invention, the heat exchanger component (1) is constituted of a carrier material (2) and at least two layers (3, 4), a first layer (3) having an electrically insulating effect and a second layer (4) allowing temperature control, that is to say cooling and/or heating of the electrical energy accumulator (18). The heat exchanger component of the invention is flexible and has a reduced weight.
