Abstract (en)
[origin: WO2014167085A1] A method for fusing a plurality of video streams, characterised in that it comprises the following steps: (E30) - defining at least one reference time, (E4) - defining construction parameters of a panoramic image merging the images of the video streams from the construction parameters calculated at said at least one reference time, (E5) - fusing the video streams by constructing panoramic images combining the images of the various video streams using the same construction parameters as defined in the preceding step (E4).
