Abstract (en)
[origin: CN105366090A] The invention brings forwards a device and method for applying a shrinkage film sleeve. The device is provided with a shrinkage film sleeve unit. The shrinkage film sleeve unit comprises an expanding device, especially an expanding core shaft used for expanding an opened thermal shrinkage film hose, at least one conveying roller used for conveying an expanded thermal shrinkage hose along an axial direction of the expanding direction, and at least one tearing roller used for tearing off the shrinkage film sleeve from the expanded thermal shrinkage film hose. Tearing rollers are staggered relative to the circumferential direction and an axial direction of conveying rollers.
