Abstract (en)
[origin: EP2986030A1] This disclosure provides a hearing aid comprising an assembly. The assembly comprises a microphone for reception of sound and conversion of the received sound into a corresponding first audio signal, and a signal processor for processing the first audio signal into a second audio signal compensating a hearing loss of a user of the hearing aid. The assembly comprises a wireless communication unit configured for wireless communication connected with an antenna for emission and/or reception of an electromagnetic field. The antenna comprises a first feed point connected to the wireless communication unit; and a second feed point. The antenna comprises a first branch connected to the first feed point.
