Abstract (en)
[origin: WO2014170224A1] The invention relates to a guide device (1), particularly for movable furniture parts, comprising a guide (3) along which a carrier (4) is movably mounted, wherein the carrier (4) can be engaged together with an activator, in order to accelerate or decelerate a movable furniture part, and the guide (3) has at least one linear section (30) and at least one angled section (31) on which the activator can be engaged with or disengaged from the carrier (4), wherein there is at least one damping element (23) by means of which an impact of the carrier (4) on the guide (3) or on the housing (2) is prevented. According to the invention, loud impact noises during movement of the carrier along the guide or on the housing can thus be prevented.
