Abstract (en)

[origin: WO2014170610A1] The present invention relates to an interface (100) intended to be fixed to a first rim edge (10) of an opening element (9) or of a fixed element (18) of a motor vehicle body in order to protect the retaining means (15) of a device (12) for temporarily closing the opening element (9) on the fixed element (18) provided in order to carry out the steps of painting the motor vehicle from contact with said rim edge (10). The interface (100) has a portion (105) in the general shape of a cage intended to house the temporary closing device (12). The invention also concerns a kit comprising the interface (1) and the temporary closing device (12).
