Abstract (en)
[origin: WO2014172419A2] A rigid package or dispenser assembly having multiple openings that can be used to dispense products in various ways. The openings may have different sizes so that different quantities of products may be dispensed through each opening. The lid of the dispenser assembly may include different portions and each opening may be associated with a different portion of the lid. The different portions of the lid may be connected by hinges.
