Abstract (en)
[origin: WO2014170874A1] Ironing machine (1) comprising a bearing structure (2), a sustaining element (3) associated with said bearing structure (2) and suitable for sustaining a piece of clothing to iron, emission means suitable for emitting steam and/or hot air for the ironing and/or drying of the piece of clothing, ventilation means (4) having an air suction mouth (5) and being connected to said emission means, a steam circuit with an inlet fitting (7) connectable to a steam feeding circuit, a first heat exchanger (8) suitable for heating the air conveyed by the ventilation means (4) to the emission means, a condensate outlet fitting (9) and, a second heat exchanger (16) connected to said condensate outlet fitting (9) and arranged substantially in the proximity of said suction mouth (5) of the ventilation means (4) for pre-heating the suctioned air.
