Abstract (en)

[origin: WO2016004966A1] Disclosed is a guide rail arrangement for a sectional door, comprising at least one guide rail that includes at least two straight segments and a curved connecting segment (20) for connecting the straight segments; the connecting segment includes a holding arrangement (24, 26) for retaining the connecting segment in relation to a holding device (10) at an orientation relative to the holding device which is defined by the holding arrangement.
