Abstract (en)

[origin: WO2014143678A1] Disclosed herein are example embodiments for portable wireless node orientation adjustment. For certain example embodiments, at least one device, such as a portable wireless node: (i) may detect a change in an orientation position of a portable wireless node; or (ii) may obtain at least one direction to aim at least one beam toward a counterpart wireless node. However, claimed subject matter is not limited to any particular described embodiments, implementations, examples, or so forth.
