Abstract (en)

[origin: WO2014170078A1] A housing for an electronic device and such a device are described. The housing has a main body (20) which is made of plastics and is used to hold components of the electronic device, at least one cooling element that is connected to said main element (20), metal sheets which are provided in the housing and are mechanically connected to the main body, and a cover that closes the main body (20).
