Abstract (en)
[origin: US2015107132A1] The invention is directed to improving a sole deformability of a forefoot portion and a heel portion. The sole structure 1 includes an upper plate 2 disposed on an upper side of the sole assembly 1, a lower plate 3 that is disposed under the upper plate 2 and that forms a gap S with the upper plate 2, and a pillar-shaped connecting member 4 that is provided in the gap S and that vertically interconnects the upper plate 2 with the lower plate 3. At least a portion of the lower plate 3 is divided in the longitudinal direction by a lateral indentation 30 at a position that the connecting member 4 is in contact with.
