Abstract (en)
[origin: EP2988057A1] A lighting device 1 according to an embodiment includes a socket unit 2, a light emitting unit 3, and a lid unit 4. The light emitting unit 3 is provided in an accommodation unit 21 of the socket unit 2, and includes a light emitting element 31. The lid unit 4 closes the accommodation unit 21 of the socket unit 2, and is formed with an opening portion 41 which causes light radiated from the light emitting element 31 to pass through. An end face of the light emitting unit 3 on the opening portion 41 side (light emitting unit top face 3a) overlaps with the opening portion 41 in the thickness direction of the lid unit 4, and is located on the light emitting unit 3 side rather than an end face of the lid unit 4 on a side opposite to the light emitting unit 3 side (lid unit top face 4a). A lighting device and a lighting device for vehicle which are excellent in reliability are provided.
