Abstract (en)
[origin: WO2014173562A1] The invention relates to a method for ink setting on a printing press (10), in particular on a packaging printing press (10) having the following steps: a) detection of a colour image print (R1) of a colour image (21) on a printing material (20), b) detection of a substrate print (R2) on the printing material (20) without a colour image (21), c) detection of a carrier material print (R3) on the printing material (20) without a colour image (21), which printing material (20) is joined to a carrier material (30), d) calculation of a printing image print (R4) to be expected of a printed image (24) on the printing material (20) which is joined to the carrier material (30).
