Abstract (en)
[origin: WO2014174364A1] The present invention relates to a writing implement comprising: - a tubular gripping body (10) inside which there is a housing for holding a reserve of ink, - a writing nib (12) at one end of the tubular gripping body (10), said writing nib (12) being able to be connected to a reserve of ink, - a clock mechanism (14) housed in the tubular gripping body (10). According to the invention, the clock mechanism (14), housed in the tubular gripping body (10), is a mechanical movement comprising an energy source (16), a spring balance (18), an escapement mechanism intermittently transmitting the energy supplied by the energy source (16) to the spring balance (18), and a gear-train (20) designed to drive a device for displaying time information (22), said display device being visible on a circumferential part of the tubular gripping body (10) at a position between the two ends thereof.
