Abstract (en)  
[origin: WO2014173795A1] The invention relates to a flotation device arranged to receive a compressed air cylinder (30). The flotation device comprises an expansion part (20) arranged to be expanded by compressed air and a guide (16) for supplying compressed air from the compressed air cylinder (30) to the expansion part (20). The invention is characterized in that the expansion part (20) is a silicone tube.
