Abstract (en)

[origin: WO2014173874A1] The invention relates to a flexible pipe comprising at least one tubular sleeve (20) and at least one tensile armour layer (24, 25) arranged around the tubular sleeve (20), the armour layer (24, 25) including a plurality of filiform armour elements (29). The method comprises a step of applying a protective coating (34) on at least one end section (32) of a filiform armour element (29), said protective coating (34) being applied in the form of a fluid layer which solidifies after application.
