Abstract (en)

[origin: WO2014174156A1] A display device arrangement (2) according to the invention comprises a planar structure element (23) containing passive, graphic elements and support means (11, 14) for its use position. The display device arrangement (2) further comprises an active, electronic display device (31) and a counterpart (21) of the display device (31), which are configured to attach on opposite sides of the planar structure element (23) containing graphic elements by means of quick attachment means.
