Abstract (en)

A crushing jaw assembly of a jaw crusher (100) having a support frame (108) to mount a crushing plate (113) via a mount face (111). At least one retainer (204) is fixed to the support frame and projects from the mount face. A hooked end (203) is provided at the retainer to be received within a cavity region (201) of the crushing plate and prevent the crushing plate falling from the support frame unintentionally when released from primary locking wedges (125).
