Abstract (en)  
Remote-controlled buoy (10), including a main body (11) for protection and buoyancy, a rope (12) provided at one end with dismountable connecting means (12.1) and, at the other end, connected to a winding device (13), provided on the inside of said main body (11), comprising: - a rotating shaft (13.1) of said winding device (13), which is connected to said other end of said rope (12) and is cinematically connected to motor means (14; 24) to be rotated; - automatic stoppage means for said motor means (14; 24) with rope (12) wound on said shaft (13.1), so as to prevent, in the rest position, the rotation of said shaft (13.1) in the direction of unwinding of said rope (12); - remote-control means (16) for said motor means (14; 24) that, in an operating position determined by said remote-control means (16), rotate in the direction of unwinding of said rope (12).
