Abstract (en)
The present invention relates to a stackable case (1), which enables cases of different sizes to be stacked in the vehicle and transported or stored and which can be stacked transversely and longitudinally. Basically, stacking feature is attained by engagement of the protrusions (5) provided on the lid (3) with the recesses (6) provided on the bottom of the body (2), and strength and endurance is achieved by the bands (4) provided on the lid (3) and the combined recesses (7) provided on the bottom of the body (2). Handles (8) are mounted to facilitate carrying of the stackable case (1) and leakage problems are prevented by performing this mounting process without carrying out piercing and cutting operations.
