Abstract (en)

[origin: WO2014177922A1] An apparatus (1) for processing components (3) of furniture, furnishings and the like, said apparatus comprising an inclined roller assembly (2) bearing panels (3) to be processed, said panels (3) being movable independently from one another along said roller assembly (2), said apparatus (1) further comprising one or more movable structures (4), each supporting one or more processing heads (5), said apparatus processing each said panel in a throughgoing manner, that is each said panel enters and exits said apparatus always in the same processing direction, thereby operating in a continuous manner without dead times for loading and unloading each said panel; during the panel machining said structures (4) having a same motion as that of each said panel (3), thereby said panel may be processed or machined without being stopped.
