Abstract (en)

[origin: WO2014177309A1] An information system (1), in particular for a motor vehicle repair shop, has at least one input unit (4) designed for inputting data, especially data of a motor vehicle to be repaired; a data management and/or data processing unit (2) designed to store, manage and/ or process the inputted data; and at least one terminal (6, 8) designed to retrieve, reproduce and process the inputted data and/or to input additional data and transmit these data to the data management and/or data processing unit.
