Abstract (en)
[origin: CN105363143A] The invention relates to a respirator-holding part for holding a respiratory half-mask (2). The respirator holding part includes a frame body (5) for holding the respiratory half-mask (2) and two mutually opposite, with the frame body (5) related head tape retaining means (13) for releasably holding at least one headband (3). Each head tape retaining means (13) has a head band receiving means (17) for area-wise receiving the at least one headband (3) and at least one respective head tape recording (17) at least partially laterally delimit the retaining projection (15) for holding the at least one headgear (3) in the head band receiving means (17).
