Abstract (en)  
The document describes a pump station for conveying wastewater, which is arranged to receive the wastewater being primarily transported by gravitation in an incoming pipe to the pump station and to discharge the wastewater for continued transportation, mainly through gravitation in an outgoing pipe, wherein said pump station comprises: an inlet to the pump station which is located at a first vertical level, and connected to the incoming pipe, an outlet from the pump station which is located at a second, higher vertical level and connected to the outgoing pipe, and a pump station arranged to pump the wastewater from the inlet to the outlet and a bypass arranged to connect the inlet to the outlet so that the pump arrangement is bypassed. A wastewater system and a method of conveying wastewater are also described.
