Abstract (en)  
[origin: WO2010072678A1] The present invention relates to an automobile door handle (10), comprising: an interior fitting (2), said interior fitting (2) comprising at least one metal or metallised element; an intermediate means (11) connecting said interior fitting (2) to a reference potential; an attachment means (13, 14) for retaining said interior fitting (2) on said door handle (10); said door handle (10) being characterised in that said intermediate means (11) and said attachment means (13, 14) are arranged such that the attachment of said interior fitting (2) by means of said attachment means (13, 14) involves connecting said interior fitting (2) to said reference potential.
