Abstract (en)

[origin: WO2014180555A1] In order to provide a simple design of an application dispenser for at least one component, in particular for an adjustable dosing and/or mixing dispenser, having a rotational body, in particular a ball for applying the component (s), it is proposed that a pump (3) conveys the components (A and/or B) to the rotational body (2) by the application of pressure.
