Abstract (en)
[origin: WO2014180899A1] The invention relates to a drawer slide for a movable piece of furniture, in particular a drawer (1), having a guide rail (10), which can be fastened to a piece of furniture, and a runner rail (20) which is mounted to be movable relative thereto, wherein at least one coupling element (21) is arranged on the runner rail (20) which interacts with at least one corresponding coupling element (41) arranged on the piece of furniture in order to connect the piece of furniture to the runner rail (20). The drawer slide is characterized in that at least one adjustment device (30) for moving the position of the coupling element (21) relative to the runner rail (20) in at least one spatial direction is arranged on the runner rail (20). The invention further relates to a system made of at least one such drawer guide and at least one connecting device (40) which can be fastened to a movable piece of furniture, in particular to a drawer (1), wherein the connecting device (40) and a runner rail (20) of the drawer guide can be connected to each other by means of coupling elements (21, 41).
