Abstract (en)
[origin: WO2014180988A1] The invention relates to an accommodating unit (4) of an insertion connection for fastening a drawer (1) to at least one drawer guide (5) comprising a housing (13), in which a plurality of accommodating bodies (10) are aligned with each other, wherein a guide (29) oriented perpendicular to the movement direction (x) of the drawer (1) is arranged in the housing (13) and the accommodating bodies (10) arranged in the guide (29) are acted upon against the force of a force accumulator (11, 25) from an initial position, in which the accommodating bodies lie against each other, to an insertion position, in which at least two of the accommodating bodies (10) are spaced from each other by the penetration of at least one insertion unit (6, 26, 27) between the accommodating bodies (10). The invention further relates to an insertion connection for positioning a drawer (1) on at least one drawer guide (5).
