Abstract (en)
[origin: WO2014180891A1] The invention relates to a damping element (50) for a drawer slide for damping a stop of a rolling element cage (40) of the drawer slide on a stop (21), which is arranged on a guide rail of the drawer slide. The damping element (50) comprises at least two different materials having different hardness levels, wherein at least one layer made of a harder material is applied to a core (51) made of a softer material. The invention further relates to a drawer slide, in particular for a movable furniture piece, comprising such a damping element.
