Abstract (en)  
[origin: WO2014181157A1] The present invention relates to an abrasive tool of the disposable type applicable to equipment, both professional, industrial and for hobbies, to sand materials of various types having rough surfaces. In particular, the invention relates to a device using rotating abrasive discs. More in particular, the present invention relates to an abrasive tool (1) for sanding machines, comprising a plurality of flexible abrasive discs (2,102) open at a radial cut (3) and arranged in an overlapping and staggered configuration such as to define an abrasive, lamellar-like work surface (4) with overlapping flaps (5), wherein each flap (5) is formed of a protruding portion of an abrasive disc (2, 102).
