Abstract (en)  
[origin: WO2014180541A1] The invention relates to a closure arrangement in particular for cabinet-type pieces of furniture, with at least one horizontally guided closure element, in particular a Venetian blind, a roller shutter and the like, which is arranged such that it can be moved, in the region of an opening of the cabinet-type piece of furniture, from a closed position (GS) into an open position (OS) and back, with at least one first guide element arranged on the opening of the cabinet-type piece of furniture, and with at least one rotatably arranged receiving device comprising a first receiving element and a second receiving element, which closure arrangement is distinguished in that the first receiving device is arranged such that it can be rotated about a vertical axis and in that it has at least one horizontally arranged receiving surface which at least partially receives the closure element, and to a cabinet-type piece of furniture having such a closure arrangement.
