Abstract (en)
[origin: WO2014180904A1] The invention relates to a heat exchanger for an air conditioning system in a motor vehicle having a heat exchanger network, which has heat exchanger tubes (12), in particular flat tubes (12), and at least one collection box (14), the collection box (14) comprising at least one input-side collection tube (16) and one output-side collection tube (18), which are flow-connected to the heat exchanger tubes (12). The heat exchanger (10) is characterised in that the output-side collection tube (18) has a cross-sectional area (38) that is smaller than a cross-sectional area (36) of the input-side collection tube (16).
