Abstract (en)

[origin: WO2014180574A1] The invention relates to a pistol comprising a breechblock slide (37) and a loading aid (1), which is arranged thereon, protrudes from the outer surface of the breechblock slide (37) in the form of at least one projection (21) and is detachably mounted on the breechblock slide (37), wherein the loading aid (1) of the latter is arranged under a sighting element (71) and is secured against falling out by the base (75) thereof. The invention also relates to a breechblock slide (37) for a pistol that has a substantially U-shaped profile and a loading aid (1) which is detachably mounted on the breechblock slide (37), wherein the loading aid (1) of the latter is arranged underneath a sighting element (71) and is secured against falling out by the base (75) thereof. Finally, the invention relates to a loading aid (1) for a breechblock slide (37), the mounting base (18) of which is formed in such a way as to complement a first recess (39) in the breechblock slide (37).
