Abstract (en)
[origin: WO2016038082A1] The invention relates to a suitcase (100) comprising a suitcase region (14) for receiving and transporting objects, and transportation means that are arranged in the region of an underside (U) and/or a rear side of said suitcase region (14). Attached to said suitcase (100) is a handle assembly (200) which, in a basic position, allows the suitcase (100) to be manoeuvred along a substantially horizontal surface and, in a specialised position, allows said suitcase (100) to be manoeuvred so as to slide or roll along steps or an inclined surface, said handle assembly (200) being able to be transferred from the basic position into the specialised position by means of a pivoting movement.
