Abstract (en)
The object of the invention is a fire door of a vessel which includes a door frame (1) located in a doorway, a door leaf (2) and a slide rail (3), in the door leaf are installed slide rolls (12, 13), supported by which the door leaf is movable on the slide rail, and an operating apparatus (4, 5) for moving the door leaf in relation to the doorway and the door frame, and the slide rail (3) is installed in a housing-like top part of the door frame (1). According to the invention the slide rail (3) is installed on the side of the housing-like top part of the door frame and the slide rolls (12, 13) are fastened to the top edge of the door leaf (2).
