Abstract (en)
[origin: EP2995574A1] An insert assembly (fitment) 400 includes a container mounting element 402, a spout element 406 carried by the mounting element 402, at least one support element 412, 414 and a grasp element 416 suspended by the support element(s) 412, 414 below the mounting element 402. The grasp element 416 provides a skeleton within a pouch-type flexible container 100, against which a user can grasp and squeeze the flexible container 100 for mixing or drinking. Optionally or alternatively, a mixing element 600 is suspended by the support element(s) 412, 414. The mixing element 600 impinge upon at least a portion of fluid within the container 100 to create turbulence, thereby promoting mixing of powdered material disposed within the container 100.
