Abstract (en)

[origin: EP2995713A1] The invention relates to a door (2) for closing an opening (3) of a housing (32) of a household appliance (1) for laundry care, the housing (32) having an inner space (7) that can be accessed through the opening (3) in order to allow laundry items to be inserted into the inner space (7) for the purpose of treating them by the household appliance (1) and/or to allow the laundry items to be removed from the inner space (7), the door (2) comprising: a door body (13) being adapted to be hinged to the housing (32), wherein the door body (13) has a recess (5) in order to provide a handle for a user, wherein at least a major portion of the recess (5) is formed above a horizontal centre line (17) of the door body (13), the horizontal centre line (17) being defined in a status, in which the door body (13) is hinged to the housing (32).
