Abstract (en)

This system reveals the presence of infants through one or more detectors (thermal imagers, 1) installed inside the car (as on the roof) facing the back seats (2). The detectors (1) are activated when the car is locked with the remote key fob (3). If the detectors reveal any occupant present, an alarm is communicated to the driver. The alarm can be disabled by unlocking the doors or with an appropriate button (4) located near the front seats.
